

RED RIVER AUTHORITY OF TEXAS

WATER USE CURTAILMENT ORDER HOWARDWICK WATER SYSTEM

June 1, 2018

To comply with the Authority's Water Conservation and Drought Contingency Plan, the Authority is implementing Stage 3 Water Use Restrictions due to the reduction in water production capacity currently being experienced in the Authority's Howardwick Water System. The following **Water Use Restrictions** are effective immediately and will remain in effect until further notice:

1. **Outside watering will be permitted between 7 am and 10 am Monday – Thursday only.**
2. **Even number residential addresses can water on Monday and Wednesdays.**
3. **Odd numbered residential addresses can water on Tuesdays and Thursdays.**
4. **No washing of vehicles, boats, RV's, or driveways will be allowed.**
5. **All commercial and other known high water users are asked to reduce usage and prevent waste.**
6. **Watch for leaks and notify Authority personnel immediately if one is found.**

Authority personnel will be monitoring usage and assisting customers in complying with the restrictions. However, violators of the restrictions will be subject to a temporary severance of connection and a \$50.00 fine for reinstatement.

The Authority is working with its engineers to develop plans and specifications to alleviate the issue with the well production capacity for its Howardwick Water System customers.

The Authority respectfully requests your full cooperation and assistance in this matter. A notice describing less stringent restrictions and/or termination of same will be issued once water production capacity has been restored, alleviating the need for the Water Use Curtailment Order. However, should conditions worsen, more stringent restrictions could be placed into effect.

Should you require further information on the water restrictions or have any questions, please contact the Authority's main office at (866) 723-8697.
